

# Nuclear Technology

VOLUME 212 · NUMBER 4 · APRIL 2026

## Contents

### Special Issue Featuring Selected Papers from the 2024 International Congress on Advances in Nuclear Power Plants (ICAPP 2024)

v Foreword

*Mauricio E. Tano, Piyush Sabharwall, Neal Mann*

#### REVIEW ARTICLE

**809** Numerical Analysis of Heat Pipe Performance Considering Helium Gap Effects  
*Faruk Celik, In Cheol Bang*

#### RESEARCH ARTICLES

**826** Core Neutronics Analysis of Passive Reactivity Control Device IGEM for MoveLuX Core with a Measurement and Observation of Adhered Liquid Metal  
*Rei Kimura, Daisuke Ito, Naoya Odaira, Kei Ito, Yasushi Saito, Shohei Kanamura*

**838** Key Component Selection and Multiobjective Optimization for Improving Seismic Performance of Nuclear Power Plants Considering Correlations Among SSCs  
*Hyun Su Moon, Seunghyun Jang, Minkyu Kim*

**850** Build-to-Replace Strategy to Reduce Operations and Maintenance Costs for Advanced Reactors  
*Diego Mandelli, Andrew Sowder*

**870** Technoeconomic Assessment of Ammonia Production from Biomass with Nuclear Microreactors  
*Ketan Ajay, Jay Gore, Suneet Singh, Hitesh Bindra*

**887** Preliminary Investigation of Gamma Radiation on the Chemical and Physical Characteristics of an Organic Coolant  
*Angel Vasquez, Arunkumar Seshadri, Koroush Shirvan, Jacopo Buongiorno*

**899** Physics-Based Inverse Problem Approach for Estimating Operating Conditions in Forced Convection Systems with Uncertainty Quantification  
*Haeseong Kim, Sacit M. Cetiner, Matteo Bucci*

**916** Guidance for Developing Digital Twins for Online Condition Monitoring of Nuclear Power Plant Components  
*Edward Chen, Vaibhav Yadav, Vivek Agarwal, Chaitee Milind Godbole, Hector Mendoza*

—continued—

## Contents continued

VOLUME 212 · NUMBER 4 · APRIL 2026

- 943** Training Autonomous Robotic Tasks Through the Use of Machine Learning in Simulated Realities

*Mark C. Patterson, Seth Cohen, Joel Bjornstad, Robert Amaro, James Tucker, Austin Gurley, Kyle Kubik*

- 952** Introduction of Fusion Reactors as Transmutation Systems for Minor Actinides and Fission Products

*Hiroki Shishido, Hidetoshi Hashizume*

### NOTE

- 963** Design and Thermal-Mechanical Analysis of a Supporting Structure for a Molten Salt Pump Shaft Seal Test Facility

*Shuai Che, Adam Burak, Xiaodong Sun*

### REGULAR REVIEW ARTICLE

- 989** Transition Core from Oxide to Silicide Fuel for Indonesian Multipurpose Research Reactor RSG-GAS

*Surian Pinem, Tukiran Surbakti, Endiah Puji Hastuti, Wahid Luthfi*

### REGULAR RESEARCH ARTICLES

- 1005** Sensitivity Analysis of Space Parameters for Integrated Natural Circulation Reactor Under the Rolling Condition Coupling Power Increase

*Haibo Lian, Shengqiang Li, Shengyao Jiang, Hongye Zhu, Yonghong Chen, Bo Feng*

- 1019** Analysis of Hydrogen Recombination Rates of Lattice-Shaped Catalysts Under Varying Concentrations of Hydrogen

*Youngsu Na*

- 1035** Comprehensive Study on p-n Junction and Schottky Barrier Betavoltaic Battery with  $^{14}\text{C}$  Beta-Emitting Source

*Najmeh Mohammadi*

- 1050** Proposal for a New Hybrid Explosive Atmosphere (ATEX) Risk Assessment Approach Using Risk Priority Number and Analytical Hierarchy Process Method

*Makhlouf Chati, Hefaidh Hadeif, Mébarek Djebabra, Samia Chettouh*

- 1068** Seismic Demand Sensitivity of Reactor Containment Building Using Bayesian Additive Regression Trees

*Md Samdani Azad, Tae-Hyung Lee, Duy-Duan Nguyen, Bidhek Thusa*

—continued—

## Contents continued

VOLUME 212 · NUMBER 4 · APRIL 2026

- 1086** Development of a Neutronics–Thermal-Hydraulic Coupling Methodology to Support the Safety Analysis of Ghana Research Reactor-1  
*Charles Nzoley, Emmanuel K. Boafo, Basma Foad, H. C. Odoi*
- 1119** Indirect Parameterized Risk Assessment Applied to Brazilian Nuclear Sector  
*B. C. Filgueiras, A. Miranda Monteiro de Lima, A. Facure Neves de Salles Soares, R. Alves da Fonseca, C. M. Franklin Lapa*
