

CONTENTS

LIST OF FIGURES	xii
LIST OF TABLES	xvi
PREFACE	xix

Chapter 1 Introduction

1.1 Risk and Consequence Analysis Studies	2
1.2 Accident Sequence Codes	3
1.3 Experimental Database	6
1.4 Conferences and Workshops	6
References	7

Chapter 2 Severe Reactor Accidents

2.1 Accident Initiation	9
2.2 Core Temperature History	9
2.3 Zircaloy Cladding–Steam Reaction	10
2.4 Core Degradation	10
2.5 Core Fission Product and Structural Material Inventories	13
References	14

Chapter 3 Aerosol Source Term

3.1 Aerosol Formation	15
3.2 Aerosol Release into Containment	17
References	21

Chapter 4 Containment Thermal Hydraulics

4.1 Thermal Hydraulics in Containments	24
4.1.1 PWR Containments	24
4.1.2 BWR Containments	25
4.1.3 Examples of Containment Thermal-Hydraulic Calculations	25
4.2 Steam Condensation Models	28
4.2.1 Condensation on the Walls	28
4.2.1.1 Nusselt Heat Transfer/Mass Transfer Analogy Model	28
4.2.1.2 Nusselt/Kinetic Theory Model	31
4.2.1.3 Boundary Layer Models	33
4.2.1.4 Empirical Correlations	35
References	37

Chapter 5 Aerosol Removal in Large Containment Volumes

5.1 The Aerosol Rate Equation in the Containment Volume	39
5.2 Aerosol Deposition Mechanisms	42
5.2.1 Sedimentation	42
5.2.2 Diffusiophoresis and Thermophoresis	44
5.2.2.1 Diffusiophoresis	44
5.2.2.2 Thermophoresis	49
5.2.3 Brownian Diffusion	52
5.3 Aerosol Coagulation	54
5.3.1 Brownian Coagulation	54
5.3.2 Gravitational Coagulation	57
5.3.3 Other Coagulation Mechanisms	60
5.3.3.1 Laminar Shear Flow	60
5.3.3.2 Turbulent Flow	60
5.4 Removal of Aerosols by Containment Sprays	62
5.4.1 Terminal Velocities of Falling Droplets	63
5.4.2 Collection Efficiencies	64
5.4.2.1 Interception	65
5.4.2.2 Impaction	66
5.4.2.3 Diffusion	66
5.4.2.4 Diffusiophoresis to Droplets	68
5.4.3 Comparison with Experiment	68
5.5 Shape Factors	69
5.6 Charge Effects on Aerosol Removal Rates	72
5.6.1 Charge Effects on Coagulation	74

5.7	Condensation Effects on Aerosol Removal	75
5.7.1	Nonhygroscopic Particles	75
5.7.2	Hygroscopic Particles	76
	References	81

Chapter 6 Aerosol Transport and Removal in Pipes and Pools

6.1	Uniform Flow in Pipes	86
6.1.1	Horizontal Duct	86
6.1.2	Horizontal Circular Pipe	86
6.2	Laminar Flow with a Parabolic Velocity Distribution	87
6.3	Well-Mixed Flow	87
6.3.1	Gravitational Settling Efficiency with Turbulent Flow	87
6.3.1.1	Horizontal Pipe	87
6.3.1.2	Inclined Pipe	87
6.4	Diffusive Deposition	88
6.5	Other Deposition Mechanisms	90
6.5.1	Turbulent Inertial Deposition	90
6.5.2	Deposition in a Bend	93
6.5.3	Constriction in a Pipe	95
6.5.4	Thermophoresis and Diffusiophoresis	95
6.6	Resuspension of Deposited Particles	97
6.6.1	Effects of Aerosol Solubility	97
6.6.2	Revaporization of Radioactive Aerosols	98
6.7	Aerosol Plugging	101
6.8	Aerosol Removal in Pools	104
6.8.1	Deposition Coefficients	105
6.8.2	Comparisons of Calculated and Measured DFs	106
	References	108

Chapter 7 Gas Properties

7.1	Gas Density	113
7.2	Gas Viscosity	114
7.2.1	Viscosities of Pure Gases	114
7.2.2	Viscosities of Gas Mixtures	115
7.2.3	Comparisons of the Calculated and Measured Viscosities of Air	117
7.2.4	Comparisons of the Calculated Viscosities of Steam	118
7.2.5	Comparison of Calculated and Measured Mixture Viscosities	118

7.3 Gas Thermal Conductivity	118
7.3.1 Thermal Conductivities of Gas Mixtures	120
7.4 Gas Molecular Mean Free Path	121
7.4.1 Mean Free Path of Gas Mixtures	122
References	124

Chapter 8 Core Damage Experiments

8.1 PBF Severe Fuel Damage Tests	125
8.2 LOFT LP-FP-2	129
8.3 STEP Experiments	132
8.4 PHEBUS-FP Experiments	139
References	144

Chapter 9 Large-Scale Aerosol Experiments

9.1 Containment Experiments	147
9.1.1 MARVIKEN Reactor Vessel Experiments	147
9.1.1.1 Tests 4 and 7: Reactor Vessel Geometry	149
9.1.2 DEMONA	150
9.1.2.1 DEMONA Test Results	152
9.1.3 LACE Containment Experiments	154
9.1.3.1 LACE-2 Test	155
9.1.3.2 LACE-4 Test	156
9.1.3.3 LACE-6 Test	160
9.1.4 PHEBUS Experiments	162
9.2 Deposition and Resuspension in the Primary Cooling System Experiments	163
9.2.1 MARVIKEN Pipe Deposition Tests	163
9.2.2 LACE Piping Experiments	164
9.2.2.1 CB-1, CB-2, and CB-3 Tests	164
9.2.2.2 LACE-1 Test	170
9.2.2.3 LACE-3A, -3B, and -3C Tests	171
9.2.2.4 Comparison of Measured Pipe Retention Factors with Calculations	171
9.2.3 STORM	173
9.2.4 Resuspension Modeling	175
9.2.5 Aerosol Retention in Steam Generators: The ARTIST Program	178
9.2.5.1 Retention in Dry Bundle Tests	179
9.2.5.2 Retention in Flooded Bundle Tests	179
References	181

Chapter 10 Aerosol Transport Calculation Methods and Codes

10.1	The Similitude Approach	184
10.1.1	Scaling Factors for Particle Size Distributions	186
10.1.2	Concentration Scaling Factors: Removal by Agglomeration and Deposition	187
10.1.2.1	Source Injection Period with Steady-State Concentration	187
10.1.2.2	Asymptotic Decay Period after Source Is Terminated	189
10.1.2.3	Removal Rate Constant Correlations	191
10.1.2.4	Interpolation Equations	193
10.2	Discrete Methods	196
10.2.1	NAUA	197
10.2.1.1	Containment Geometry	197
10.2.1.2	Input Size Distribution	197
10.2.1.3	Time-Step Control	198
10.2.1.4	Condensation Time Steps	200
10.2.1.5	Hygroscopicity	200
10.2.1.6	Thermal-Hydraulic Parameters	200
10.2.1.7	Gas and Particle Properties	201
10.2.1.8	Particle Agglomeration	201
10.2.1.9	Aerosol Removal by Brownian Diffusion	204
10.2.1.10	Aerosol Removal by Diffusiophoresis and Thermophoresis	204
10.2.1.11	Aerosol Removal by Sprays	204
10.2.1.12	Multicompartment	205
10.2.2	MAEROS	205
10.3	Code Comparisons	206
	References	209
